

Motorhome checklist

1	Check the tyre pressures on your motorhome - don't forget the spare	
2	Switch off the LPG gas cylinder and make sure it's securely in an upright position	
3	Empty the water tanks if you can - full tanks seriously limit you capacity and you may be at risk of overloading	
4	Disconnect the mains cable and stow it away	
5	Secure any loose items in your motorhome and fasten the travel catch for the fridge and cupboards	
6	See that the exterior locks are both latched and locked	
7	To save yourself a headache, pad areas that are prone to rattling with tea towels	
8	Set your 12V control panel on your dashboard to 'Car' or 'Off' - do the same for the fridge	
9	Raise your corner steadies and stow away the step	
10	Check all your road lights are working	
11	See that your mirrors and rear vision camera are in the correct position
